

I have been an amateur radio operator for over 20 years now and can not believe that we as hams must all get together to defend something that has done so much for the entire world. Yes there are times when it's just a hobby and fun, but there are also times of disaster. This has been proven time and time again. I know that the Amateur radio operators don't have much to do with Military involvement anymore but what about the days when if it were not for the Amateur operators putting in those long hours of operations not just for disasters but also for our brothers who were in the military. If it wasn't for the Amateur radio operators helping in such exercises along with military our service men over seas may not have gotten the messages that were intended. If this BPL gets passed I will know in my heart that the FCC and the government really doesn't care about helping the United States Of America or the rest of the world for that matter. Please let us be heard and continue helping the world. If BPL is passed and with what I have heard as far as interference from this plan of communication our voices will be silenced.

Thank you for your time,

Merrill Brown,
